

LEXITEK skill created and live.

Name: brudo-lexitek

Location: /home/workdir/.grok/skills/brudo-lexitek/

Validation: OK (106 lines) · example pressure report PASS

What it adds

Builds on brudo-lexical-technology with **pressure-aware** lexical operations drawn from the NU_FREE_DM_S scan and teaching corpus.

Capability	Executable rule
Core law	Promotion expands; demotion atomizes
7 pressure dimensions	breadth · sharpness · depth · direction · persistence · closure residual · promotion asymmetry
6 transformation families	order+unequal decomposition · taxonomy→process · hub absorption · surface-peer divergence · horizontal rank leakage · repair hides class break
Claim ladder	12 typed evidence levels; symbolic/rhetorical cannot impersonate established physiology
HER audit	actor before abstraction · mechanism before label · tissue before diagnosis
Closed-Loop Map Interrogation	resolve / unresolved / newly introduced / return to physical reality & affected person

Relationship to existing skills

Skill	Role
brudo-lexical-technology	Closed 12-term operating vocabulary
brudo-operating-status	Fail-closed status + panel contracts
brudo-lexitek	Pressure detection and class-break analysis on coordinated terms

LEXITEK is the skill that answers: *when coordinated concepts rewrite, which members gain anatomy, which are demoted, and what class break is being hidden?*
