

### Three more skills built. All validated.

| Skill                       | Encodes                                                                                                                                                     | Lines     |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| brudo-legal-filing-atlas    | 51-jurisdiction official-source registry (Federal + 50 states + DC). Court structure, e-filing, pro se, forms, fees, variation. No stealth. No case advice. | 80 · PASS |
| brudo-mechanistic-rendering | Local diagnostic pipeline: model → geometry → boundary conditions → validation before narrative. First unit tests = deformable-tube pressure/flow suite.    | 74 · PASS |
| brudo-human-burden          | Top-level DV = Bruce's burden. Continuation cues / parent objective, time-to-first-action, restarts, reconstruction effort, honest failure surfaces.        | 82 · PASS |

brudo-legal-filing-atlas · brudo-mechanistic-rendering · brudo-respiratory-adaptation · respiratory-adaptation-canon · critical-infrastructure-cyber-resilience

These three close the loop on the parallel campaigns (LEGAL\_FILING\_ATLAS + MECHANISTIC\_RENDERING) and the teaching-thread top-level dependent variable (Bruce's burden, not fluency).

Still open if you want it next: consolidate the two overlapping respiratory skills, or add closed-loop-map-interrogation as a standalone.
