

Three new skills built + respiratory pair consolidated.

Skill	Purpose	Lines
brudo-promotion-asymmetry	Core pressure law — <i>Promotion expands; demotion atomizes.</i> Score all 7 dimensions on any coordinate rewrite	82 · PASS
brudo-coordinate-class-break	Detect hidden class breaks — taxonomy→process, hub absorption, surface-peer divergence, rank leakage, repairs that hide their own break	82 · PASS
brudo-fwocr	FWOCR as executable burden decomposition (not a peer label beside STTDM/IPANM)	73 · PASS

Consolidation: respiratory-adaptation-canon is now a thin deprecation alias pointing at brudo-respiratory-adaptation as the single canonical respiratory skill.
