

Domain selected: Semiconductor Supply Chains

Why different: Explicit alternate in the uploaded CI-resilience campaign; distinct from Critical Infrastructure Resilience, climate CRP, LRD international, LEGAL_FILING_ATLAS, and MECHANISTIC_RENDERING.

  ]
}

```

Scale delivered

- **4 workstreams · 21 packages · 10 launch-queue assignments**
- Full package contract (source/claim/measurement fields, evidence classes, independent lineages)
- Safety boundaries (public-source only, non-operational)
- Program failure conditions that reject category collapse
- Explicit non-overlap with the CI resilience campaign and climate CRP program already present in the archive

Next executable step under authorized initiative: release SSC-001 (source-of-truth registry) or say which domain/assignment to run first.
